12. Amounts concerned	Budget line(s) (article, item): 14.020140 Total estimated cost: EUR 3,400,000 Total amount of EU budget contribution EUR 3,400,000			
MANAGEMENT AND IMPLEMENTATION				
13. Type of financing	Indirect Management with Italian Agency for Development Cooperation.			

1.2 Summary of the Action

The overall objective of the action is to reduce maternal and infant morbidity and mortality associated with preterm birth and congenital malformations in the short and long term, within the framework of the right to health. The intervention targets the entire national territory, with all Salvadoran mothers and children as potential direct beneficiaries, as well as their families, the health personnel and the entire community as indirect beneficiaries. This with the expectation that the good practices carried out during the project are taken on board, learnt and replicated in the future, thus benefitting families beyond the project execution period. In fact, as is well known, an action to strengthen the maternal and child health sector not only ensures an effect beyond the duration of the project itself, but also guarantees long term benefits to the entire health care system.
