

Instructions for Using Verse Database

The verse database and printing utility has been evolving throughout this year and we are now on the 11th edition of this document. The website has recently gone through another 'make over', which in our opinion makes it look more professional.

To access the utility you can now open it straight from the menu on each page of the website. Here is a view showing the home page and the link to the database:

Welcome to our site

We are passionate about card making and we would like to invite you to share your interests in card making with us.

On our Website we have many interesting items on our site that we think will be of interest to you.

- Some links to suppliers websites
- Many articles on card making techniques
- A unique utility which allows you to print greetings verse for your cards
- Database of nearly 1000 verses
- The ability to type in your own verse
- Videos on card-making techniques in our Gallery
- Feedback facility to allow visitors to comment on our site

We hope that you will enjoy our site and you will visit us again SOON!

About Us

Religious Holiday and Festivals

RELIGION	EVENT
Jewish	Simchat Torah
Christian - Ethiopian Catholic	Meskel

It Happened on This Day

Event Type	EVENT
Born on this day	Marvin Lee Aday aka Meat Loaf in 1947
Died on this day	Edgar Degas - Painter, Sculptor in 1917
Happened on this day	Albert Einstein publishes his theory of relativity in a German journal of physics in 1905

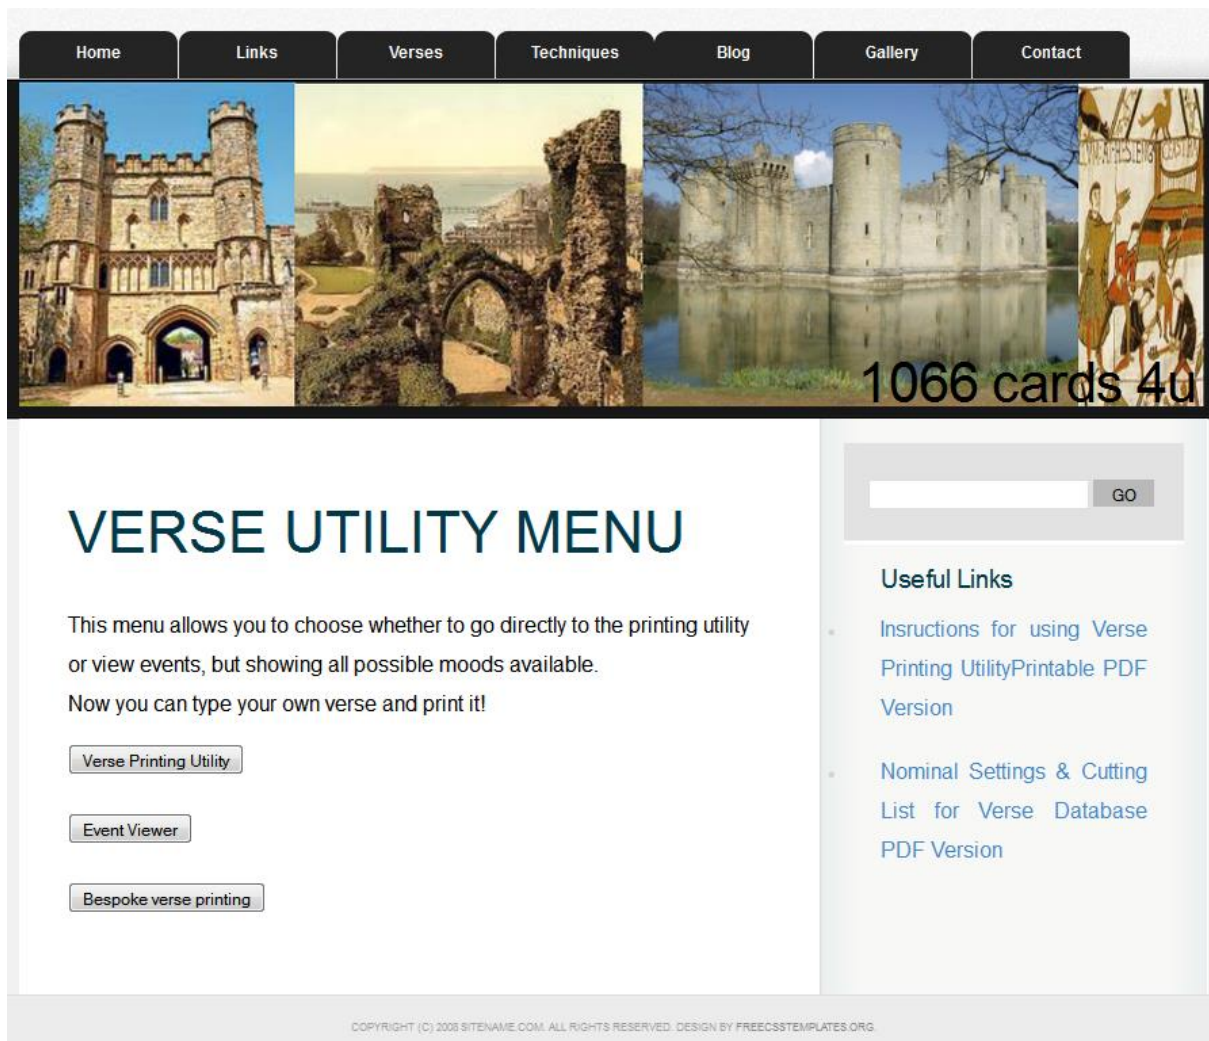

NEWS FLASH!

NEW LOOK website!
Even smarter looking site. Religious holidays and festivals now shown on home page and new list of events that happened on this day.

IMPORTANT CHANGE - We have made it easier to select your verse. The query now contains an extra column with a 'Radio' button. Click on the verse you require and proceed to the next page and set the variables. When you submit the verse you

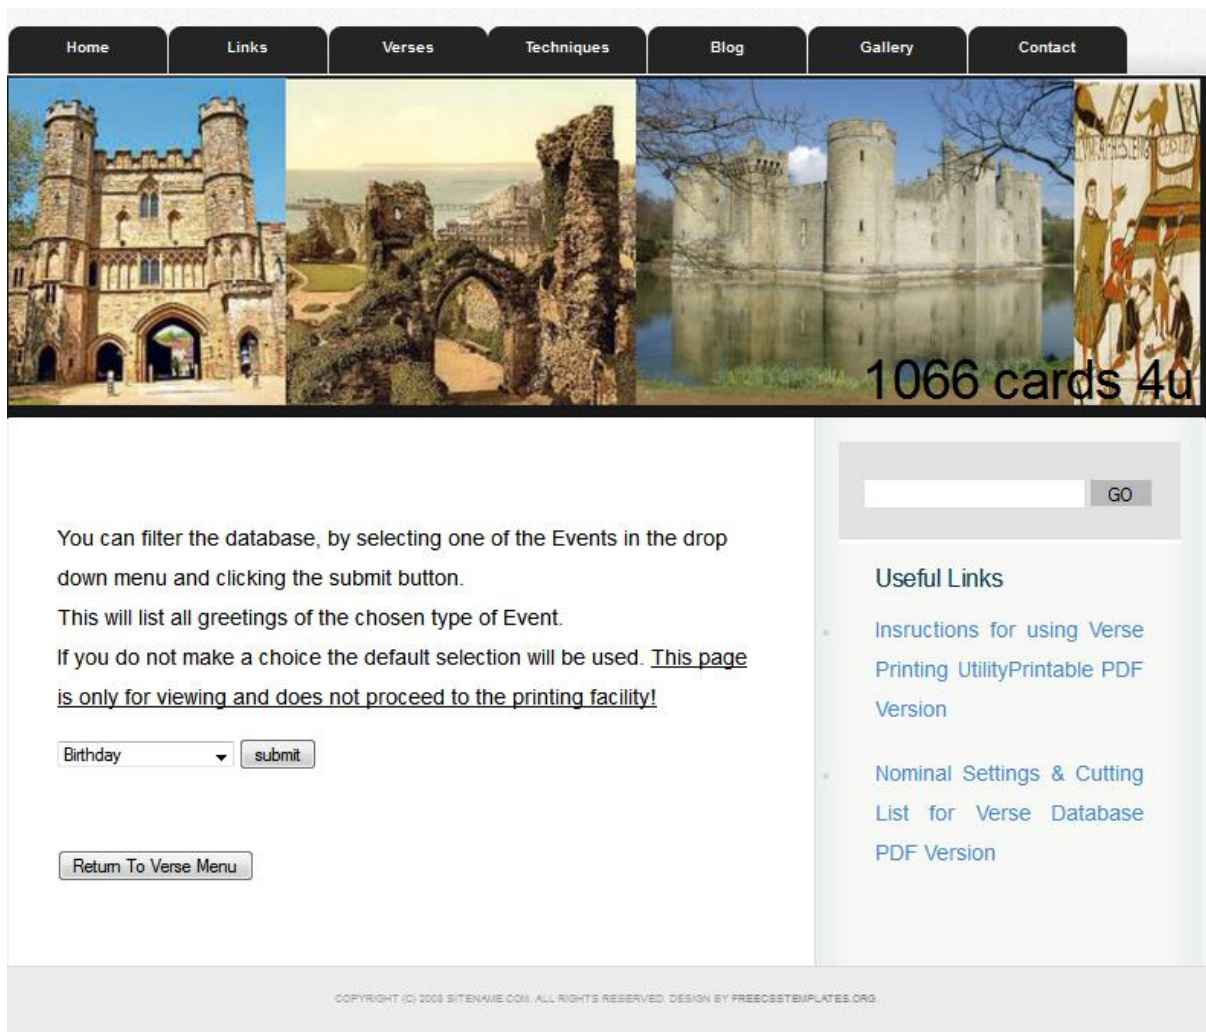

Instructions for Using Verse Database

Because the database is getting quite large it is difficult to know exactly what moods are available for each event. For this reason we have introduced a view page. To accommodate this we have introduced a menu page, where you can choose to either view the events or proceed to the Verse Printing Utility or even input a verse of your own. We have also added 2 links to the instructions document and to the nominal settings document, which open in a separate window so you can flip between the settings and the document. This has been added to all relevant windows.

Instructions for Using Verse Database

If you choose Event viewer from the menu, the following screen is displayed:

The screenshot shows a web application interface for the Verse Database. At the top is a navigation menu with links: Home, Links, Verses, Techniques, Blog, Gallery, and Contact. Below the menu is a banner image featuring three photographs of castles and a medieval manuscript page. The text "1066 cards 40" is overlaid on the right side of the banner. The main content area contains instructions for filtering the database by event type. It includes a dropdown menu set to "Birthday" and a "submit" button. Below this is a "Return To Verse Menu" button. To the right of the main content is a sidebar with a search bar and a "GO" button, followed by a "Useful Links" section containing links to instructions, printing utility, nominal settings, and a PDF version. The footer contains a copyright notice: "COPYRIGHT (C) 2008 SITENAME.COM. ALL RIGHTS RESERVED. DESIGN BY FREESSTEMPLATES.ORG".

1066 cards 40

You can filter the database, by selecting one of the Events in the drop down menu and clicking the submit button.

This will list all greetings of the chosen type of Event.

If you do not make a choice the default selection will be used. [This page is only for viewing and does not proceed to the printing facility!](#)

A button has been provided to go back to the Verse Menu on this page.

Make your choice as to which Event you wish, using the dropdown list box and then click on the submit button. A screen similar to the following will be displayed:

Instructions for Using Verse Database

From this menu you must choose the following options:

1. Card size – (Dropdown menu)
2. Distance from top in mm – see * below (Text Entry)
3. Font size in points – see * below (Text Entry)
4. Text Colour – Default Black - (Dropdown menu)
5. Text Font – Default French Script - (Dropdown menu)
6. Border Image – Default No Border - (Dropdown menu)

*(See nominal settings list at the end of the Instruction document or print a copy using the link on the Techniques page).

When all of these parameters have been entered click on the submit button at the bottom.

All of the greetings printout on A4 paper, however if you are printing A6 portrait or landscape you may well be able to print 2 inserts by turning the paper around after the first pass. The Cut Sizes are the measurements that you will need to cut the paper after printing. All measurements are relevant to a datum zero from the top left hand corner (i.e. for horizontal measurements from the left hand edge, for vertical measurements from the top).

It may be a good idea to test this on some low quality paper first, until you are happy with the position, and when you are happy click on the Submit button. We normally use a high quality and heavier paper for the finished insert. Some of the fonts take up more room than others, so you will have to experiment so as to fit on the insert. If it is too big it will spill over into a second page, so adjust the font size until it fits on one page.

The top position will depend on the length of the verse.

When you have clicked on the Submit button, the screen will go blank and depending on the browser you are using, you will be invited to open or save the Verse.PDF file that has been generated. Unless you are intending to use this insert in the future we recommend that you OPEN the file.

With Internet Explorer 9.0 there will be a prompt at the bottom of the screen asking you to Save/Open.
