

**Handwashing is the single most important means of preventing the spread of infection.**

U.S. Centers for Disease Control  
and Prevention  
-Atlanta, GA

### Did You Know

- Up to 20% of adults get the flu during the season
- 100,000 people are hospitalized and 36,000 die from the flu and its complications (2 million hospital acquired infections per year)
  - The CDC estimates that the annual costs of hospital-acquired infections are \$6.7 billion
  - US Industry trends show a growing demand for wipes, while alcohol-based gels have dropped as much as 40% in some markets

### The Problem

- 1 in 3 adults **do not** wash their hands after using public restrooms.
  - 2 of 3 adults **do not** wash their hands after sneezing or coughing.
  - 4 of 5 **do not** wash their hands after handling money, a major carrier of disease germs.
- 164 million school days are missed each year due to illness.

## Kleenhanz® is the preferred non-alcohol towelette

that uses a safe and effective water-based formula to clean, sanitize and remove 99.99% of germs.

### Advantages & Benefits

- ✓ Leaves hands feeling soft and smooth
- ✓ Antimicrobial and Hypoallergenic
- ✓ Creates a physical barrier to germs
- ✓ Non-flammable and Non-toxic
- ✓ Better detergency action
- ✓ Provides long lasting germ protection
- ✓ Longer protection than alcohol-based products
- ✓ Is not an irritant to cuts and scrapes
- ✓ Is safe to use on children and infants
- ✓ Water based product (over 99%)
- ✓ **Handwashing On-the-Go®**

### The Truth About Alcohol Based Hand Sanitizers

- ✗ Not an effective alternative to handwashing
- ✗ Smear dirt and germs on hands, but do not clean
- ✗ Should be used on hands which are already clean
- ✗ Are both flammable and toxic
- ✗ Can be dangerous to children/infants if consumed
- ✗ Dry and crack hands with persistent use
- ✗ Irritate cuts and scrapes
- ✗ Have a foul odor from heavy concentrations of alcohol (60%+)
- ✗ Stops working after alcohol dries (only 15-20 seconds)
- ✗ Are banned in many school districts
