

Nutech 2703 Automatic Air Sampling Device

The Nutech 2703 automatic sampling device is an ideal product for automated air sampling. It is useful for standard environmental testing, scientific research, and 3rd party monitoring. Features include: an integrated timer, flow control, pressure reading, leak checking, auto QA/QC, a smartphone app with access to full system control.

Compared with its predecessor 2701, the updated 2701 integrates the current limiter, timer and vacuum pressure gauge in one controller which makes it the most advanced air/gas sampler on the market.

Nutech 2600ST Multifunctional Automatic Sampling System – for Fixed-site/Stationary Air Sampling

The Nutech 2600ST is the world's first fully automatic air sampler for collecting air samples in both canister and DNPH, an advanced solution in air sampling for environmental testing, scientific research, and 3rd party monitoring.

It comes with 2 configurations for different sampling situations. Desktop configuration normally used in desktop situation that needs to be connected with an external computer to control. While vertical configuration is vertical and integrated design that offers foldable pads to hold the canisters. It is equipped with steering wheels for easy movement and a built-in tablet computer to control and thus no need to connect to external computer.
